Richard Mann Introduces The Scout Rifle Study

Princeton, WV (January 2017) The Scout Rifle Study is a new book written by Richard Mann. It offers a comprehensive look at the history of the Scout Rifle and its place in the new millennium. This is the first major firearms publication to be offered in a free access, webpage format. Not only is this revolutionary, it allows for a host of features not supported in the print and e-book format.

“The way shooters get their information is rapidly evolving. Print and e-books lack speed of delivery, the ability for revision, multi-media diversity, and the reader interaction demanded today. That’s why I chose to offer my latest book in a free-access, webpage format.”

Richard Mann
Author, The Scout Rifle Study

Interested readers can register at thescout rifle.com and will receive e-mail notifications when new chapters or content has been added. Once on the site they will be able to read, watch video, and interact in a highly active discussion forum with other Scout Rifle enthusiasts. The site will also include a market place resource for Scout Rifle aficionados.

Gunsite founder Jeff Cooper worked with and wrote about Scout Rifles for most of his professional life. The Scout Rifle was Cooper’s concept, one-rifle answer. Up until the last few years the Scout Rifle has existed with nothing but a cult like following. However, as Cooper once predicted, it is becoming the rifle of the 21st century. According to Mann, “People are finally beginning to realize Cooper was mostly right; the simplest one-rifle solution for the world is a Scout Rifle.” The Scout Rifle Study will contain more than 60,000 words, 20 chapters, thousands of images, and hundreds of videos. It is the definitive resource for the Scout Rifle.
